shap@henu.edu.cn

The 2nd International Conference is a follow-up after the success of the 1st Sino-Hellenic International Conference in Kaifeng, Henan University in 2019.

The theme of *Global Issues of Environment & Culture* encompasses a broad field concerning the interaction of human development over millennia with the environmental factor.

The non-linear trend of evolution of ancient cultures is decisively affected by climatic change, seismic and volcanic destructions, terrestrial but astronomical impacts too, social

uprising, pandemics and more.

At the same time natural sciences applied to material culture and delving into the stratigraphic record reveal, document & reconstruct buried antiquities & proxy palaeoclimatic data.

Landscape & Skyscape agents exert an impact towards intangible and material heritage.

Modern humanity's task is to preserve the memories of the past, using Hi Tech and proper management.

This event is organized by Henan University and the University of the Aegean.

Accepting proposals on topics including but not limited to:

- Enviro-cultural reports from ancient literature sources
- Cultural management, innovation technologies & sustainability
- Climate change & ancient cultures
- Disaster archaeology
- Silk Road: operational sequences of artefacts & diffusion of ideas
- Geoarchaeological issues
- Sacred landscapes & religious aspects
- Archaeological sciences & archaeometry
- 3D Reconstructions
- Remote sensing applications
- Predictive modelling of archaeological sites
- Archaeological parks
- Geoarchaeological Parks
- Skyscape Impact on Cultural Development
- Miscellaneous
