The 2nd International Conference is a follow-up after the success of the 1st Sino-Hellenic International conference in Kaifeng, Henan University in 2019 (<http://huaxiahellas.com/1st-international-sino-hellenic-conference/>). The theme of Global Issues of Environment & Culture encompasses a broad field concerning the interaction of human development over millennia with the environmental factor. The non-linear trend of evolution of ancient cultures is decisively affected by climatic change, seismic and volcanic

destructions, terrestrial but astronomical impacts too, pandemics and more. At the same time natural sciences applied to material culture and delving into the stratigraphic record reveal and document buried antiquities, past destructions and past daily life. Literature sources and scientific tools are used to study ancient societies, their rise and decline, trade and diffusion of ideas, arts & culture. Modern humanity's task is to preserve the memories of the past.

*This event is organised by Henan University and the University of the Aegean*

**Accepting proposals on topics including but not limited to:**

- Enviro-cultural reports from ancient literature sources
- Enviro-cultural issues in ancient societies
- Cultural management, innovation technologies & sustainability
- Climate change & ancient cultures
- Disaster archaeology
- Silk Road: operational sequences of artefacts & diffusion of ideas
